Skyus™ 160 LTE Gateway for Business Flexibility

Nimble and Self-service Businesses are the New Normal

The first half of 2020 has forever changed the way we work, do business, and consume goods and services. Customers are looking for new and easy ways to conduct their transactions while some businesses are pivoting and adapting their business models in order to survive. Flexible retail environments are becoming the new normal. From self-service kiosks to pop-up, temporary locations or contact-less service offerings, the ability to manage a business efficiently and securely is more important than ever before.

Keep Your Business Running Smoothly

The Skyus 160 will ensure that you don't have any downtime or loss of productivity because of a poor connection. Perfect for fixed and mobile environments, for one location or one-thousand, the Skyus 160 was designed to scale and meet all of your business's budget and performance needs providing:

- Cat-6 LTE with 300/50 Mbps   - Multi-carrier support/Dual SIM   - 4400mAh battery
- WPA2 Wi-Fi security support   - Enterprise-grade VPN pass-through   - Plug & play convenience
