- Unserved or underserved schools
- Remote employee connectivity

¹ Battery life depends on a number of factors including connected devices, amount of traffic, network strength, etc.

MiFi PRO M4 Seller Talk Track

Open the conversation

"How does your team stay securely connected when they're away from the office or working from customer locations?"

Position the MiFi PRO M4

"MiFi PRO M4 is Inseego's next-generation enterprise-grade mobile router, delivering reliable connectivity across Verizon's 5G Ultra Wideband and LTE networks. With Wi-Fi 7, Ethernet, and enterprise-grade security, it provides a business-ready connection wherever work happens."

Key specs to highlight

- 5G standalone connectivity for fast, reliable mobile broadband
- Wi-Fi 7 for high-speed local connectivity across multiple devices
- Ethernet port for wired connectivity to laptops, POS, or shared equipment
- Optional external antenna ports for challenging RF environments
- VPN passthrough for secure access to corporate networks
- Onboard speed test for real-time performance validation
- FIPS 140-3 certified for government and compliance-sensitive deployments

Discovery prompts

- Do you have employees who work remotely, travel frequently, or operate from temporary sites?
- Do you have locations, events, job sites, or mobile teams that need internet access where wired connectivity isn't available?
- Are your employees relying on personal phone hotspots or public Wi-Fi to get work done?
- Does your company have security or compliance policies around how employees connect outside the office?
- How many devices does a typical mobile employee need to connect at once?

Handling objections

"Our employees just use their phone hotspot."

- MiFi PRO M4 is more than a smartphone hotspot. It delivers dedicated Verizon 5G Ultra Wideband connectivity, Wi-Fi 7, Ethernet, and enterprise-grade security in a portable solution designed for mobile workers, temporary locations, and business continuity needs.

"Is this really different from what we already carry?"

- "Most mobile hotspots are designed for consumer. MiFi PRO M4 is purpose-built for business, with Ethernet connectivity, external antenna support, integrated speed testing, advanced networking features, and enterprise-grade security that business customers need."

"Is it secure enough for our business?"

- "Absolutely. MiFi PRO M4 is FIPS 140-3 certified, supports WPA3 security and VPN passthrough, and includes enterprise-grade security features designed for business and government environments."

Close

"Let's pair MiFi PRO M4 with the right Verizon data plan to deliver secure, reliable connectivity for mobile workers, temporary locations, and business continuity needs."
