Inseego MiFi PRO M4335 Seller Guide

Business Internet That Goes Where Business Goes

What is the MiFi PRO M4335?

The exclusive device for Verizon Business Internet On-the-Go, delivering business internet with no wires, no installation and no waiting.

Key Technical Highlights

5G mmWave, C-band, sub-6 & LTE
Wi-Fi 7 (up to 50 devices)
1 Gbps Ethernet port
WPA3 security & advanced networking
Dual TS-9 antenna ports
8+ hour battery life / AC operation

Top Use Cases

Temporary Locations: Get online quickly at temporary offices, seasonal locations and pop-up operations.
Job Sites & Worksites: Provide reliable connectivity wherever work is happening.
Events & Mobile Operations: Support exhibits, registrations, demonstrations and mobile business operations.
Business Continuity: Stay connected when primary internet service is unavailable.

When to Bring It Up

Opening a temporary location
Setting up connectivity at a job site or worksite
Supporting an event or mobile operation
Getting online without waiting for installation
Maintaining connectivity during an outage

Qualifying Questions

How are you connecting temporary locations, job sites, or mobile operations today?
How quickly do you need internet up and running?
Are there locations where traditional internet installation isn't practical?
What happens when your primary internet service is unavailable?
Which devices, applications, or operations depend on a reliable connection?

Objection Handling

Phone hotspot is enough: Business Internet On-the-Go with MiFi PRO M4335 extends connectivity beyond traditional fixed locations.
Already have internet access: Extends connectivity beyond fixed locations and provides backup connectivity when primary internet service is unavailable.
Need to connect business equipment: MiFi PRO M4335 supports wired business devices through integrated Ethernet connectivity.
Need a more advanced solution: Business Internet On-the-Go with MiFi PRO M4335 delivers business-grade networking and security capabilities.
